SHRINIVAS A.M

Dharwad, Karnataka, India
+91 9886361791 — Shrinivasamasalavad@gmail.com

PROFESSIONAL SUMMARY

Final-year BCA student specializing in Artificial Intelligence, Machine Learning, Computer Vision, and Embedded Systems, currently interning at IIT Dharwad. Skilled in Python, OpenCV, YOLO, ESP32, Raspberry Pi, IoT, and real-time AI applications. Experienced in developing intelligent systems for smart agriculture, wildlife monitoring, and industrial safety. Collaborated with international students from Germany and Nigeria on AI, robotics, and embedded systems projects. Passionate about Edge AI, robotics, autonomous systems, and solving real-world problems through technology.

EDUCATION

Bachelor of Computer Applications (BCA)
Karnataka University — Expected Graduation: 2026
Specialization: AI/ML & Embedded Systems

INTERNSHIP EXPERIENCE

AI/ML & Embedded Systems Intern
Indian Institute of Technology Dharwad

- Working on Wireless Networking technologies and AI-based Object Detection Systems.
- Developing real-time Computer Vision applications using YOLO and OpenCV.
- Exploring Embedded AI solutions using Raspberry Pi and ESP32 platforms.
- Building intelligent systems for Wildlife Conservation and Industrial Safety.
- Working on Edge AI and Autonomous System integration projects.
- Contributing to sensor-based intelligent monitoring applications.

TECHNICAL SKILLS

Programming Languages: Python, C, C++

Artificial Intelligence & Computer Vision: Machine Learning, Computer Vision, YOLO Object Detection, OpenCV, Image Processing, MediaPipe

Embedded Systems & IoT: ESP32, Raspberry Pi, IoT Systems, Sensors Integration, Hardware Interfacing, Autonomous Systems

Tools & Platforms: Git, GitHub, Linux (Ubuntu), VS Code

Core Concepts: Data Structures Basics, Edge AI, Wireless Networking, Real-Time AI Systems, Robotics Integration

PROJECTS

AI-Based Wildlife Conservation System

- Designed intelligent wildlife monitoring systems using AI and Computer Vision.
- Developed real-time object detection and alert systems for wildlife monitoring.
- Integrated sensors and embedded platforms for field-level deployment.

Smart Agriculture Innovation System

- Built sensor-based smart agriculture solutions using IoT and Embedded Systems.
- Developed automation concepts for real-time environmental monitoring.
- Focused on practical AI applications for agriculture and farming support.

Real-Time Object Detection System

- Developed AI-powered object detection applications using YOLO and OpenCV.

- Optimized Computer Vision models for real-time edge-device deployment.
- Worked on intelligent monitoring and detection pipelines.

Embedded AI & Sensor Integration Projects

- Worked with ESP32, Raspberry Pi, and sensor modules for intelligent systems.
- Developed hardware-software integrated solutions for real-world applications.

INTERNATIONAL COLLABORATION & GLOBAL EXPERIENCE

- Collaborated with German students on Robotics and Sensor-based Engineering projects.
- Collaborated with Nigerian students on Robotics, AI/ML, Real-Time Object Detection, and Embedded Systems projects.
- Participated in global technical discussions and collaborative innovation activities.
- Gained international exposure to AI systems, embedded technologies, and engineering solutions.

ACHIEVEMENTS

- Participated in National-Level Science Exhibition.
- Showcased innovation projects at Vigyan Bhavan.
- Selected for Annular Solar Eclipse Science Program at State Level.
- Received recognition for participation in science and innovation activities.
- Working on patent-pending projects related to Wildlife Conservation and Smart Agriculture technologies.

CERTIFICATIONS

NITK Certified — 2023
National Institute of Technology Karnataka

- National Science Program Participation Certificate
- Robotics and Sensor-Based Engineering Activities
- AI and Embedded Systems Project Development

AREAS OF INTEREST

Artificial Intelligence, Machine Learning, Computer Vision, Embedded Systems, Edge AI, Wildlife Conservation Technology, Industrial Safety Systems, Wireless Networking, Robotics, Autonomous Systems

CURRENTLY LEARNING

Deep Learning, Generative AI, Advanced Edge AI Systems, Real-Time AI Deployment, Intelligent Embedded Solutions

LANGUAGES

Kannada, English, Hindi
